NOTE.—The figures in the above Table (No. 4) give the amount of the actual net receipts derived from the Revenue due to the Exchequer; and do not therefore correspond exactly with the figures in Table No. 2, which gives the payments made into the Exchequer, "Exchequer Receipts," on account of these duties in each year.

* The net receipt of Property and Income Tax, &c., represents the amount of Tax actually collected within the year (irrespective of the year of assessment) less the amount of Tax refunded, &c., within the year (see note § on page 35). The amounts under the several schedules show the approximate net receipt of the Tax based on the assessments of property and income under each schedule.

¶ The increased Stamp Duties did not come into force until the year 1910-11.

* "Loan Charges" comprise repayments of principal made otherwise than out of sinking funds, payments to sinking funds, and interest on borrowed moneys. For the year 1911-12 such sums are included, as re-classification of the loans of the London County Council having been made for that year (see note ** to Table No. 23 on p. 47 and note § p. 57).

† Table A (on pp. 54 and 55) includes, and Table B (on pp. 56 and 57) excludes, expenditure met out of loans under the Education (Provision of Working Balances) Act, 1903.

TOTAL EXPENDITURE.‡							Total Expenditure of Local Authorities defrayed out of Loans.

† The total expenditure given above slightly differs each year from that given in Table No. 22 (pp. 44-9), owing mainly to the exclusion of the expenditure of Police Pension Funds (which is included in the previous Table), and to the educational returns being taken from different sources, whereby, in 1902-3 to 1907-8, certain expenditure on account of higher class public schools is included in the above figures but excluded from those given in Table No. 22.

‡ Inclusive of the cost of collection of school rates by Parish Authorities under the Poor Law Acts to 1898-9, excluded in subsequent years. The election expenses paid to County and Burgh Authorities under the same Acts are excluded in all years.

† Includes 736,948, in 1907-8 in respect of expenditure incurred in former years and met temporarily out of Contingent, &c. Funds.

** Including payments into Sinking Funds.

† Excluding Warrington from 1912, previously included.

‡ The figures for Plymouth and Southampton have been increased by the inclusion of vessels "calling off" the port to land or embark passengers or baggage. Such vessels, unless "brought to" in the immediate vicinity of docks or quays, were excluded up to the end of 1906, but have been included from 1st January 1907.

¶ The change stated in the † note to Table No. 62 on pp. 310-1 has caused increases in the figures for some Ports from 1912 inclusive, and decreases in others.

Notes.—The above Return includes vessels belonging to the Isle of Man and the Channel Islands.

The number of persons employed in the year is the sum of the number of persons forming the first crew of each vessel employed during the year.

The Home Trade includes vessels trading or going within the following limits, viz.: the United Kingdom, the Isle of Man, the Channel Islands, and the Continent of Europe between the River Elbe and Brest.

The Foreign Trade includes vessels trading or going beyond the above limits.

Some vessels known to be trading abroad are omitted from the Return owing to the fact that no late information of the number of their crews could be obtained.

* Vessels employed on rivers and going beyond smooth water limits as defined in the regulations regarding Passenger Vessels, but not beyond *partially* smooth water limits, have been excluded from the Employment Returns since the end of 1910. 791 sailing vessels of 34,976 tons and 86 steam vessels of 3,809 tons, which would have been included in the totals for 1911 had the basis remained unchanged, have thus been excluded.

† Including Masters, Pilots and Lascars. The numbers of British and Foreign sailors and of Lascars are stated below:—

† A revision of the list of articles included under the head of Minerals was made in the year 1903, and the tonnages of Minerals and General Merchandise, and the receipts therefrom, are not strictly comparable with those given in prior years.

‡ Weight of Minerals and General Merchandise, the details for which cannot be separately distinguished.

§ The decrease shown, on comparison with 1907, is apparent only—a duplication of 30 miles in the returns made to the Board of Trade having been corrected in 1908.

NOTE.—Most British Joint Stock Banks are registered under the Companies Act, 1862, and, consequently, the bulk of the Capital of such concerns is included in the figures given in the above Tables. With the exception of Municipal Tramways, the majority of the Companies working tramways in the United Kingdom are registered under the Companies Acts, and their Capital is accordingly also included. Railway Companies in the United Kingdom are not incorporated under the Companies Acts, but by special Acts of Parliament, as they need powers beyond those conferred by registration under the Companies Acts. Their Capital is, therefore, not comprised in these Tables.

§ The figures given under this head relate to the Postal Telegraph and Telephone services combined. Owing to the amalgamation of the services the figures cannot be separately distinguished. A new method of grading was introduced in 1912-3, and for purposes of comparison the figures for the previous year 1911-2 have been given on the same basis.

|| Including Telegrams dealt with entirely by Submarine Cable Companies in this country.

† The large increases shown under the heading of "Telegraphs and Telephones" in 1911-2 are mainly due to the transfer of the business of the late National Telephone Company. The "length of line" transferred has not, however, been included until 1912-3, as figures for the previous year are not available, but the figures relating to "length of wire" are complete.

NOTE.—For additional particulars to those given in above Tables respecting the British Army, see the General Annual Report on the British Army for year ended 30th September, 1913, Cd. 7852.

* On the 1st January of the year following that stated. † The Militia strength is that at the date of inspection, except for the years 1900, 1901 and 1902, when the date was 1st July. The Reserve Division strength is that on the 1st July. The Militia Reserve disappeared before the inspection of 1907. ‡ At the date of inspection. § On the 1st November in each year.

|| The small numbers in 1899 to 1901 are due to the number of men called out in the latter part of 1899 for active service. The number so called out form part of the Regular Army, but the increase in the number of the Regular Army shown in the previous Table does not correspond with the decrease shown in this Table, because the average strength of the Regular Army for the year is shown and not the number at a given date, as in the case of the Army Reserve.

** Includes 2,163 Volunteers.

†† Strength on 1st October of each of the years stated. The Militia was converted into the Special Reserve during 1908. From 1908 inclusive there were, in addition, a number of Militiamen and men of the Reserve Division still serving on their old term of engagement. The Regular Establishment of the Special Reserve is included in Regimental Establishments above.

‡‡ Strength on 1st October of each of the years stated, including the Isle of Man Volunteers. There were also, on 1st October 1913, 1,669 of all ranks in the Territorial Force Reserve.

* For years up to 31st July, 1904, reference should be made to the statistics relating to Secondary Schools and Schools of Science contained in the Volumes of Statistics and the Annual Reports published by the Board of Education. The figures are not given here, because in many cases they include particulars which cannot properly be compared with those given in this table. The term "Secondary School" bears the meaning assigned to it in the Board of Education's "Regulations for Secondary Schools."

† Part-time Teachers are counted once for each school in which they served.

‡ The figures for years up to the year ended 31st July, 1907, relate to 30th June of the year, or, in the case of a comparatively small number of schools, to the following 30th November. The figures for the year ended 31st July, 1909, relate to 1st October, 1907. The figures for subsequent years give the number of pupils on 31st January of the year, and for the year 1913 they are classified according to their ages on that date.

§ Figures comparable with those for 1913 are not available; the age classification given for full-time pupils in the previous issue of this Abstract related not to 31st January of the year stated, but to the previous 31st July. See note † above.

* The statistics compiled for years up to 31st July, 1901, relate to the Evening Schools recognised under the Evening Continuation School Code of the late Education Department. They are accordingly not included, because they are not comparable with the statistics given in this table, which relate to Evening Schools as defined in the Board of Education's "Regulations for Technical Schools, etc." (Ch. 2). The year ended 31st July, 1902, was a transitional year.

† Students who attended more than one School are counted separately in respect of each School which they attended; the number of individual Students was therefore less than the number given in the table.

‡ For the year ended 31st July, 1910, the ages relate to 31st July, 1909.

§ Students who attended more than one Course are counted separately in respect of each Course which they attended; the number of individual Students was, therefore, considerably less than the number given in the table.

* The terms "Day Technical Classes" and "Technical Institution Courses" in this table bear the meanings assigned to them in the Board of Education's "Regulations for Technical Schools, etc." (Ch. 3). Institutions in receipt of grant for the year ended 31st July, 1912, under the "Statement of Grants available from the Board of Education in aid of Technological and Professional Work in Universities in England and Wales" are not included in the figures for that year; this explains the decrease in the figures for "Technical Institution Courses" for Courses were not recognised under the Regulations before the years ended 31st July 1905 and 1904 respectively; and in the former year Students in Day Technical Classes who were under 15 years of age were not recognised for grant.
